## **CFAWin8 SaaS Recommended Minimum Client Requirements\***

### **Minimum Client Requirements to Run CFAWin8 SaaS:**

- Windows 7 Pro, Windows 8 Pro or Windows 10 Pro
- Microsoft RDP protocol installed
- 32-bit processor running at 1 GHz or higher
- 4 GB of RAM
- 250 MB free disk space
- 100 Mbps Ethernet Connection
- High-speed broadband Internet connection

### **Additional Hardware:**

- Monitor with 1024x768 resolution
- Keyboard and mouse
- Ethernet-ready laser printer compatible with RDP (multi-function drivers not accepted)

### **Access to CFA Software's Secure SaaS Servers Also Requires the Following:**

- CFA Software client certificate (will be installed by CFA Software)
- Firewall port 443 open for HTTPS to CFA Servers
- Static public IP address (for whitelisting purposes)

**Please note:** Your public IP address can be determined by typing *What is My IP* in a Google search

\*Minimum client requirements based solely on CFAWin8. Client performance may vary depending on your network hardware and software configuration. As with any NT kernel-based system, you might improve performance by adding more memory. A faster CPU might also improve performance.
