CFA ShopFloor Change Log Details

Location	Description

Version 8.1.1187 (Revision 4194)

Default Screen	Repair Views	Fixed: **Active Shop Locations** view will now display a tree view of all jobs for the selected location.

CFA ShopFloor Change Log Details

Location	Description

Version 8.1.1187 (Revision 3763)

Repair Detail Tab | Notes Section

Underlined: Updated: Editing **Notes** from the Repair Detail are separate from the **Mechanic Notes** added during the Job Out function.

Added: **View All** hyperlink near the Notes to see Mechanic Notes created during Job Out function.

Job Control | Job Out Function

Updated: Job Notes field saves independantly from the Repair Detail notes and are also referred to as **Mechanic Notes** . These mechanic notes can no longer be overwritten accidentially or lost when prompt with an error message such as the RO record lock.

Added: **View All** button to see all Mechanic Notes tied to the repair detail line.

Application

Added: Feature allowing internal mechanics to be tied to vendor accounts. This functionality grants mechanics the capability to service any vehicle as if they are an **Outside Mechanic** doing the work.

Added: Options to suppress **Labor Costs and Hours** from displaying in the Repair Detail, Mechanics, and Repair History tabs.

Location	Description

Version 8.1.1183 (Revision 3021)

Jobbing In Window — <u>Fixed</u>: Error message prompt stating a prohibiting change has been attempted but allowing the change anyway. Issue caused by changing a Unit Number for a Repair Order when there is an existing Repair To-Do on a detail line.

CFA ShopFloor Change Log Details

Location	Description

Add/Edit Repair Parts Window

Added: Ability to scan a ***Kit Master bar code*** to a repair.

Repair Info & Repair Detail Tabs

Added: Issue a warning to override the Job In/Job Out times when ***direct editing*** is enabled. ***Direct editing*** allows fields in these tabs to be edited directly on the screen. The ***Override Flag*** will be set if edited.

Repair Detail Tab

Added: Warning for changing the ***Repair Site field*** between Inside Repair and Outside Repair if Mechanic/Vendor field or labor hours/costs have values.

Changing this field will have the following effects:

1) Blank out the 'Mechanic/Vendor' field
2) Zero out all 'Labor' Hours and Costs

Please click
   - OK to continue and make these changes, or
   - CANCEL to leave it as it was.

Repair Detail Tab

Updated: Disallow changes to the ***Mechanic Field*** if the Repair detail row has Job In/Job Out times linked to it.

Equipment Tab | Hot List

Fixed: Occasional error when using ***Add and Job-In*** link.
